“ARCHITECTURE IN WATERCOLOR”

Learn basic linear and aerial perspective and the techniques necessary to translate architecture into watercolor paintings.

Paul will demonstrate the versatility of watercolor paint through a calculated layered approach. You will learn how to mix colors using a limited palette and how to work in thin layers of washes to build up luminous colors. Paul will lead you step-by-step with illustrations of the painting process. Emphasis will be on what makes a good painting, planning the entire picture area, the importance of thinking through the composition, good division of shapes, value planning, what to communicate about the subject, and how to correct mistakes.

If watermedia is your passion, then this highly energized painting workshop is for you! Paul's stress-free, positive approach toward the act of painting will inspire you to loosen up and have fun again. Expect an intense, concentrated and lively workshop where you will elevate your understanding of how watercolor can be controlled.

Paul is the author of *Painting Spectacular Light Effects in Watercolor*. His work is often featured in *The Artist's Magazine* and *International Artist*. He is a signature member of the American Watercolor Society and National Watercolor Society.
